

Peregrination
Rick Shearman
The Macnaughton Focus Gallery

Friday 4 March - Sunday 1 May

Having grown up in Byron Bay and completing a degree in Visual Arts at the Queensland College of Art, I have spent much of the last 20 years travelling and working around the world, freelancing on various projects as a creative director and delivering lectures as an educator at universities and conferences.

During those years I have lived in Denmark, Germany, Italy, Austria and Costa Rica, spending much of that time observing, assimilating and soaking up the world and cultures around me — all the while recording en plein air the visual stimuli I have encountered and been inspired by in my day-to-day musings.

This exhibition will include an amassed collection of visual journals documenting these travels and reflections along with a series of larger drawings and prints derived from these journals.
